poster outdoor kiosk 55

Artikel-Nr.: 221.000001

Technical Data:

Housing material	V2A stainless steel, thickness 2mm, base thickness 10mm
Surface	powder coating in outdoor quality (color flexible)
Locking	multiple, cylinder lock plus rotary bolt
Glass	Laminated safety glass, Clearvision (100% colorfast)
Usage	Suitable for unprotected outdoor installation
Display	Designed for 55 inch high brightness display
maximum display depth	137mm
Display front cooling	permanent, 126m³/h recirculation
Cooling	temperature-controlled, air exchange max. 8x210m³/h
Heating	temperature-controlled, max. 800W power
Surge protection	Leakage current 6.5kA, optical and acoustic signal
Winter safety system	Display operation only after prior heating
Special features	Thermal insulation for lower energy consumption
	LED lighting on the side (color adjustable)
Temperature usage max.	-25°C to +55°C (depending on the display used)
Weight	approx. 190kg (plus display)
Dimensions BxHxT	approx. 920x2180x200mm

The robust information terminal with its visually appealing design is ideal as a year-round outdoor advertising and information source.

The flanking LED lighting is a particular eye-catcher.

The colors can be individually set or set to color-changing programs.

An illuminated information cube is optionally available as an additional eye-catcher.

If desired, the terminal can be equipped with an interactive touchscreen. The modern sensor supports up to 10 simultaneous input points.

High-quality components with low-noise air conditioning ensure reliable, year-round operation, and the use of innovative housing insulation saves energy.

The information column can be equipped with the appropriate display depending on requirements. The integration of light sensors for automatic brightness control is supported.

Optional features:

• Fanless industrial PC for 24/7 operation with Windows operating system.
• Wireless data connection for WLAN, LTE, UMTS, and GSM.
• Software solutions for presentations and information.
• Custom integrations, such as cameras, card readers, printers, etc.

This terminal model is available in single-sided and double-sided sizes for 55" and 75" displays, and with Touchscreen
